WORK EXPERIENCE

LV and ELV system design engineer

Imposti MEP

01/2026 - Present

Tbilisi, Georgia

Tasks:

- Designing building's low voltage and extra low voltage electrical systems;
- Drawing structural and single-line diagrams;
- Selecting electrical appliances and wiring;
- Preparing BOQ;

Head of electrical regime statistics division

Georgian state electrosystem

07/2023 - 11/2023

Tbilisi, Georgia

Tasks:

- Managed the Electrical Regime Statistics Division, overseeing data analysis, reporting, and process improvements;
- Assisted in optimizing electrical regime calculation workflows within a new software environment;
- Electrical regime, Transmission system's total energy loss and N-1 condition calculations;

Engineer at electrical regimes and development department

Georgian state electrosystem

04/2022 - 07/2023

Tbilisi, Georgia

Tasks:

- Electrical regime calculations based on next-day load and generation forecasts;
- Transmission system's total energy loss calculations;
- Calculations of N-1 condition;
- Execution of specific tasks assigned by dispatcher;

Internship at low and medium voltage transmitting lines designing subdivision

Energopro Georgia

07/2019 - 09/2019

Tbilisi, Georgia

Tasks:

- Designing electrical transmission lines from substation to consumer;
- Selecting electrical appliances and wiring;

EDUCATION

Master of Electrical Engineering, Power Engineering and Management

Czech technological university in Prague

10/2023 - 06/2025

Prague, Czech republic

Bachelor of Power and Electrical engineering

Georgian technical university

10/2021 - 07/2023

Tbilisi, Georgia

პროგრამები

Autocad

Revit

SunLiS

MS Office

PV*SOL

PVSyst
